

MIGUEL RIVERO LÓPEZ

Senior Frontend Developer

miguelriveroloop@gmail.com • +34 690859525 • in/miguelriverolopez • Barcelona, Spain

PROFESSIONAL SUMMARY

Senior Frontend Developer specialized in Vue 3 + TypeScript. I build accessible, performant, component-based apps with strong testing and CI practices. I work closely with design (Figma) and product to deliver clean, maintainable UX. Ready to apply this expertise in React environments through shared concepts (Composition API ↔ Hooks, Pinia/Vuex ↔ Context/Redux).

CORE COMPETENCIES

Frontend Development: Vue 3 (Composition API), TypeScript, JavaScript (ES6+), Component Architecture, State Management

Build Tools & Performance: Vite, Webpack, Performance Optimization, Bundle Analysis, Code Splitting

Testing & Quality: Jest, Vue Test Utils, Vitest, Unit Testing, E2E Testing, Test-Driven Development

UI/UX & Design Systems: Figma, Storybook, Responsive Design, Accessibility (WCAG), Design Tokens, Component Libraries

Development Practices: Agile/Scrum, CI/CD, Git, Code Reviews, Pair Programming

PROFESSIONAL EXPERIENCE

PHARMACELERA

February 2026 – Present

- Built the PharmScreen SaaS frontend: Vue 3, TypeScript, Vite, Pinia, Vitest in a monorepo with Express proxy and Electron desktop.
- Delivered high-performance drug-discovery UIs: 3D molecular visualization (NGL/RDKit), experiment data tables, web workers, IndexedDB, and C++ WebAssembly.
- Designed an AI engineering layer (agent documentation, Cursor skills, Copilot constraints) to enable safe, architecture-aware AI-assisted development.

COLLECTIVE MINDS RADIOLOGY

November 2021 – June 2025

- Led Vue 3 + TypeScript development using Composition API; shipped a reusable component system and design tokens, accelerating feature delivery.
- Set up Vitest + Vue Test Utils with CI; sustained 85%+ coverage and gated PRs to keep quality high.
- Partnered with UX in Figma to implement an accessible, responsive design system (WCAG AA).
- Mentored developers on component architecture, state management, and testing best practices.

NESPRESSO

June 2020 – November 2021

- Ran data-driven A/B tests with marketing and built accessible, localized UI components reused across markets to improve engagement, conversion, and delivery speed.

CREATIVE HOTHOUSE

January 2014 – April 2020

- Delivered e-commerce and dashboards in AngularJS/Vue using reusable components, routing, and state patterns; partnered with product/design on responsive features that improved usability and delivery cadence.
